PROJECTS

IncubateX Template and Mobile Application *incubatex.org*
Built: HTML5, CSS, Jquery, Materialize, Node.js

Designed the UI/UX of the template and developed the San Francisco specific location. Developed the interface of the mobile application as well.

Conjugation Champions
Built: Java

A Java-based game teaching basic concepts of Spanish such as conjugations, and vocabulary. This application is being built with GUI components with developed user interface.

Way To Go CUHacks 2 *shivansal.github.io/WayToGo*
Built: HTML5, JQuery, CSS, Materialize, Google Maps API

A web-application using the Google Maps Directions and Matrix API to recognize the most environmental healthy transportation routes.

Trill-Play Los Altos Hacks *shivansal.github.io/Trill-Play*
Built: HTML5, JQuery, CSS, Materialize, Node.js, Angular.js, Swift, Spotify/Youtube API

Music party app that allows a host to create a virtual party. People who are attending the party can suggest music and upvote-downvote music. This replaces a DJ and is a convenient/affordable alternative.
